

AMENDMENTS TO THE SPECIFICATION:

Please replace the paragraph beginning on page 2, line 10 with the following replacement paragraph:

--A low-pressure spray module provides a particle-free pressurization which is carried out without a pump, using a receiver tank which contains a flushing medium pressurized with compressed air. ~~At~~ An exchangeable spray lance having a variable diameter, shape and length is attached on the outlet side of the receiver tank, it being possible to couple the spray lance to a metering diaphragm valve; if nozzles are used, external cleaning of the components is also possible, and furthermore, the particle-containing flushing medium arising during the spray cleaning is collected in a collection tank in which an analysis filter is installed, which filters the particles out of the flushing medium and preserves them for later analysis.--.
